

Differential Scanning Calorimeter

The Q20 is a cost-effective, easy-to-use, general-purpose DSC module, with calorimetric performance superior to many competitive research-grade models. The Q20 is ideal for research, teaching, and quality control applications that require a rugged, reliable, basic DSC.

Make and Model:

TA Instruments / DSC Q20

Specification/ Features:

- Dual digital mass flow controllers
- Thermal analysis, rheology and microcalorimetry of the sample.

Available mode of use:

Solution state

Temperature Range: -90°C to 500°C

Whether the facility is open to external users: Yes

Location:

Room no: 370, Second Floor, Central Facility

Department: Chemistry, IIT Bombay, Powai, Mumbai-400076

Contact details: 022-25764159

Convenor/incharge Name : Prof. Nand Kishore (nandk@chem.iitb.ac.in)
